Discuss Swimming Pool.

A committee of the Junior Board of Trade met with the town council on Monday evening to discuss the proposed swimming pool project.

Mr. Ed Ford, who was spokesman for the Board, stated that a most suitable site had been chosen immediately west of the creamery. He stated that the Crystal Dairy Co. had offered to give the land in return for town property adjoining the creamery. They had also offered to run the water from the creamery through the pool and allow the use of their drainage system.

Mr. Ford said that it was hoped to get the excavating for the pool done this year and that the Junior Board of Trade would see that the work was done by donated labor. Subscriptions would be solicited in order to meet cost of materials used.

He said that plans had not yet been completed, but he thought that in addition to the swimming pool a wading pool for the little children should also be incorporated in the scheme.

The council unanimously agreed that an exchange of lands would be made with the Crystal Dairy Co. if the project was carried out.

Detailed plans and specifications will be made and will be presented at an early date.

Liberals Getting Ready For Federal Election

The Liberal party is getting ready for the federal elections which, it is stated in some quarters, will probably be held next year.

The Red Deer constituency will hold its nominating convention at Olds on October 21st when Hon. J. G. Gardiner, minister of agriculture, is slated to speak.

The names of A. C. Bury, of Olds, and J. P. Ferguson, of Trochu, are being mentioned as probable candidates to be brought before the convention for nomination.

Two other federal cabinet ministers, Hon. Norman Rogers, minister of labor, and Hon. C. D. Howe, minister of transport, will address liberal nominating conventions in the province this month.

Mr. Howe will address the Medicine Hat constituency convention on October 12th, the Macleod constituency convention on October 13th, and the Peace River convention at McLellan on October 15th.

Mr. Gardiner will speak at Hanna on the afternoon of October 19th at the Acadia constituency convention, and at Olds on October 21st. Mr. Gardiner will also address the Athabasca constituency convention at Ft. Paul on October 28th.

Mr. Rogers will address the Battle River constituency convention at Wainwright on October 25th, and the Jasper Edson constituency convention at Edmonton on October 26th.

The Lethbridge, Vegreville and Wetaskiwin conventions will be held in December, but no dates have yet been set.

Golf Club Notes.

We wish to thank the members who kindly donated their time and assistance in fixing up the greens, especially Frank Kaufman for putting in new cups.

Air Mail Service Now Underway

First air mail under the new service provided by Trans Canada Airlines arrived in Lethbridge at 8:42 a.m. Saturday. Pilots "Jock" Barclay and Ted Allen flew the plane from Winnipeg.

A total of 120 pounds of air mail was taken from the plane at Lethbridge and transferred to the machine making the inaugural flight to Edmonton. The plane left Lethbridge at 4 a.m. for the northern trip.

Right on the dot of 8:45 p.m. Saturday the twin-motored Trans Canada Airlines Lockheed electric monoplane lifted its wheels from the Edmonton airport and started out on the inaugural flight of the western airmail to Lethbridge.

The ceremony started at 8:15 p.m. when Mayor John W. Fry, city commissioners and other civic officials gave brief addresses. At 8:30 the mail from the Edmonton post office arrived, carried in the old Macleod stage coach, drawn by four horses and driven by Frank Dyne.

Rain Delays Threshing.

Heavy rain the first of the week put a stop to threshing operations in the district.

Threshing is well underway and the majority of farmers have got most of their grain under cover. East of town threshing is practically completed, only tag ends of late-cut coarse grains are yet to be threshed. In the west, where the crops were heavier, quite a lot of threshing is yet to be done. Threshermen report that it will take about ten days to complete the job.

Ducks Reported to be Plentiful

Duck shooting opened at an unopportune time for the hunters of this district. Townspeople were busy Saturday afternoon, farmers were threshing, and the first of the week was unfavorable weather.

One or two got out, however, and Russell Ady got a full quota of ducks on Saturday afternoon and reports that the birds are plentiful. Huns are reported to be more plentiful than last season.

Olds Store Thieves Carry Out Two Jobs

Night prowlers broke into two Olds business places Thursday night and tried to gain entrance to a third. They took in all over \$100 worth of goods and cash and caused some damage.

Entrance was first made to the Builders' Hardware store through the office window, after prying apart iron bars. Knives, watches, razors, comb and brush were taken, and the dial of the safe was backed off with an axe.

Entrance was gained to Maybank's Drug store through a skylight. Five dollars in cash, three cameras, and numerous cigarettes were taken. The flashlight and pinch bar were left behind as was the case in the hardware.

Attempt was also made to break into the Olds Mercantile Co. but it is reported that they were scared out by the barking of a dog which was in the store.

Thanksgiving Day.

Monday, October 10th, has been proclaimed Thanksgiving Day, and all business houses, therefore, will be closed. Stores will be open all day Wednesday, October 12th.

W.C.T.U. Convention Here Next Week.

Among the many interesting items on the program of the Provincial W.C.T.U. Convention to be held in the Evangelical Church, Didsbury, on October 12, 13 and 14, will be the grand gold medal elocution contest, an address by Magistrate Fitch of Calgary, on the "Court's responsibility in accident prevention," and the annual president's address by Mrs. Grace Knight.

Knox United Church Choir will render special selections on Wednesday evening and the Evangelical Church Choir will assist in the program on Thursday evening.

The 100th anniversary of Frances E. Willard's birthday will be commemorated by the planting of a peony on the lawn of the Bible School.

A short history of the 23 years of W.C.T.U. work in Alberta will also be given.

Announcements will be made later regarding the times the above address and contest will be held.

Track Meet This Friday.

The Inter-School Track Meet will be held at Carstairs tomorrow (Friday) with Didsbury, Olds, Bowden, Innisfail, Carstairs and Crossfield competing.

The local school has been training for the event for the past month and has competitors in practically all events.

NOTICE

Notice is hereby given that the first general meeting of the Neapolis Co-operative Dairy Association will be held in the Lone Pine Hall on Tuesday, October 11th at 1:30 p.m. The Government has sanctioned the building of the proposed cheese factory, and it is expected that several Govt. officials will be present.

Evangelical Church Notes

The pastor will speak on the subject, "Peace and Thanksgiving" next Sunday morning. Let each person bring a thank-offering.

Next Sunday evening Rev. Lytle of Calgary will be present and will present the interests of the British and Foreign Bible Society.

"BUY IN DIDSBURY"

Knox United Church Notes.

THANKSGIVING SERVICES.

Thanksgiving services will be held throughout the charge and a full attendance is urged. The minister will have charge of all the services. Please note the hours:

Westcott at 11 a.m.
Westerdale at 2:30 p.m.
Didsbury at 7:30 p.m.

A cordial invitation is extended to all friends to share in these special services.

Vigilance Means Safety

With the shooting season for birds now in full swing and the time for hunting of big game to follow a little later, it is an appropriate time to remind all who handle rifles, shot guns and revolvers that sudden tragedy lurks close by for some victim of carelessness.

Now is the time to remember that all too frequently it is the "unloaded gun" that unwittingly snuffs out a life or is responsible for irreparable injury to a child, a relative or a companion, or that he who is careless with firearms may cause death or injury to himself without a moment's warning.

How It May Happen

There are those who will go out blithely for a day of enjoyment in the crisp autumn air and who will return to their homes full of grief and remorse over some accident for which a moment's thoughtlessness was responsible and the memory of which will never be entirely obliterated.

There is the sportsman of excitable temperament who is too keen to get in his shot and will not wait before pressing the trigger until he is quite sure of the nature of the object at which he points his weapon. He sees something move and that is sufficient. He raises his gun to his shoulder and lets fly in the general direction of the movement. His quarry may be a bird, it may be a dog or a cow or it may spell "curtains" for a child or a hunting friend.

Then there are those hunters who will surround a comparatively small slough laden with ducks and who pull the trigger hastily in their anxiety to get a bird without making sure that their companions are not in line to receive all or a portion of the discharged pellets. Such accidents are too common around sloughs skirted with bush which may render visibility imperfect.

There are also those who, despite the cautions frequently uttered by those well versed in rules of hunting, will carry their loaded guns at a dangerous angle, risking the lives of their companions; those who will drag guns through fences without regard to the direction of the muzzle and the risk of snagging the trigger; those who will place loaded guns in the house inviting death for some innocent child or curious adult and those who, despite the law to the contrary, will persist in firing guns from a moving automobile, wagon or buggy.

All of these and others who violate the huntsman's common rules of safety are a constant menace during the hunting season. None of them can be charged with murder, yet the result of their actions may be the same as those of the man who sets out to kill deliberately his kind, but they cannot be excused because lack of ordinary precautions were not taken or because the commonsense rules of safety were not observed.

Rules Of Safety

"Safe carrying of guns must become a definite habit," recently said C. K. Howard, manager of the Fish and Game Department of the Canadian National Railways, in an interview outlining a few suggestions, the rigid observance of which would constitute an insurance policy against regrettable accidents.

"The golden rule is that the muzzle of a carried gun must never sweep the horizon," he continued. "If an accident discharge takes place it should send the shot into the ground before the feet of the person carrying the gun, or into the air. The muzzle of a gun should never be allowed to point towards the person carrying it nor toward any other person."

"Guns being taken into boats or vehicles, or over fences and other obstructions, should precede the person carrying them. Cartridges should be removed on entering camp or a house. Loaded guns should never be aimed at anything unless the person intends to pull the trigger. No loaded gun should be placed where it may be knocked down by a dog or a child, nor can there be any excuse for a loaded gun standing where it may be handled by a person who does not know that the weapon is loaded."

"Perhaps the most frequent cause of shooting accidents is the dangerous habit of some hunters who shoot at something moving in the bushes, without first making certain that the moving object is the game they seek rather than a hunting companion."

As Mr. Howard properly observed, "Few accidents happen to people who are careful of their guns. The precepts of safety are simple. If they are generally observed many lives can be saved each hunting season. The hunter must never forget that the man who 'didn't know it was loaded' is always with us."

Mr. Howard struck at the root of the matter when he said that few accidents happen to people who are careful with their guns. It is true there may be an occasional accident which could not be foreseen or prevented, as for instance, when the hunter with his eye on his quarry trips over some minor obstacle at his feet, but such accidents are rare and nearly all the tragedies that occur in the hunting field can be attributed to carelessness and sometimes to criminal negligence.

Thrills For Onlookers

Pilot Shows What Skill Can Do In An Emergency

Icy nerve plus superlative ability and judgment combined to thrill military and newspaper observers at Camp Borden with an example of what can be done in a moment of emergency.

The pilot of an army co-operation plane of the Royal Canadian Air Force, taking part in the war manoeuvres sent chills up the spines of those on the ground as he swept close to the ground at terrific speed and hooked a despatch which had been strung on wires between posts in the middle of a cleared field.

Circling far above, the plane suddenly went into a steep dive, a steel hook dangling from below the landing gear. Coming almost to ground level, the plane flattened out, sped between the posts and missed the message by inches. Quickly the pilot put his machine into a steep climb and went back east of the field for another attempt.

With the wind screaming in the struts and the observers on the ground almost reconciled to a smashup, the plane dived once more and there were gasps as the machine appeared to be headed directly for the trees. But the pilot knew his job. He skimmed the tree tops and went straight for the centre of the two posts. For a moment it seemed as though the hook had again missed its objective, but as the plane rose once more it was seen to have securely caught the paper.

Raymond Massey In New Role

A Canadian Representing Abraham Lincoln, Brings Comments From New York Newspaper

Prospect of a Canadian actor playing the role of Abraham Lincoln on a New York stage was too much for the tabloid Daily News.

The News, worked up over the idea of a British subject playing such a "thoroughly American" part as the great emancipator, shoved the subject of international affairs to the tail end of its single editorial column and gave over the leader space to discuss the question: "A Canadian as Abraham Lincoln?"

Prompting the editorial was the much-heralded performance of Raymond Massey of Toronto in Robert E. Sherwood's "Abraham Lincoln in Illinois," scheduled to open early in the new theatre season.

Sherwood himself picked Massey for the part. The News thinks Massey as an actor is "fine" and "he certainly does look like Lincoln." But it finds the nationality angle a big hurdle.

"We think he is going to stumble over something. In the subconscious minds of those who watch him, unable to unify the actor with his part, there is bound to be this question: 'Why in the world should a Canadian (you might say an Englishman, in view of his years of experience on the British stage) play the part of so thorough an American as Lincoln?'"

Motor Car Development

In Early Days Few People Foresaw The Future Of The Industry

W. G. Robertson, secretary-treasurer of the Canadian Automobile association, asserted in a speech at the Canadian Good Roads association convention that few in the early days foresaw the future of the "horseless carriage." The British Association for the Advancement of Science concluded at its 1896 session that such vehicles could never be widely used because their operation would require too much skill and their drivers would not have "the advantage of the intelligence of the horse in sharing his path."

W. B. Hutcheson, of Ontario highways department, said the experience in Ontario has been that when a loose gravel or stone road had to carry traffic in excess of 500 vehicles per day the maintenance charges per mile per year were excessive and it was practically impossible to keep the surface in a standard serviceable condition. Advantages of transforming such roads to a more permanent type of dustless surface were fairly obvious.

With the exception that the molecules are arranged differently, diamonds are of the same material as the soot of a lamp chimney, or the lead of a pencil.

First Gold Brick

Production Has Started At The Yellowstone Mine

Signaling the start of actual gold production in the Northwest Territories, the first gold brick, weighing 72½ pounds, was poured recently at the Consolidated Mining and Smelting Company's Yellowstone mine. It was announced by Dr. Charles Camsell, deputy Minister of Mines and Resources for the Dominion.

Dr. Camsell, accompanied by G. Hanson, assistant chief geologist of the Federal Geological Survey department, arrived at Edmonton after a tour of northern mining centres in Canadian Airways plane piloted by Con. Farrell.

Dr. Camsell officiated at the pouring of the brick.

Constitute A Menace

One Driver In Every Ten Afflicted With Night Blindness

Ten per cent. of automobile drivers are afflicted with "night blindness," a sudden failure of vision with the approach of darkness, Dr. Ulysses Forget, Warren, R.I., said in a paper delivered to the Association of French-speaking Doctors of North America in convention at Ottawa. "If such people drive a car at night, without realizing their affliction, they are a menace both to themselves and others," he declared.

Her brood of eight cygnets dying from a rare disease, a swan refused to leave her nest at Eton College, England, or to allow anyone to approach. After two weeks college employees put a fence around the nest so the feathered mother could have complete solitude.

New Grape Products

Will Help Take Care Of Large Crop In South Africa

The South African News Letter says South Africa grape farmers, menaced by over-production of wine, are trying desperately to find new grape products. The latest products to be marketed are grape jelly, glace grapes and grape slabs.

The jelly is similar in appearance to red currant jelly, and is intended for use in the same way. The glace grapes look like jujubes; they are made from a stiffer mixture than the jelly. The slabs are a semi-solid food containing all the nutriment of the grape juice, skins and seeds.

Improved Driving Practices Necessary For Reduction Of Automobile Accident Rate

Reduction of the automobile accident rate depended mostly on improved driving practices and attitude and law enforcement must be directed primarily to that end, Howard M. Baker, traffic engineer of Montreal police department, said at the annual convention of the Canadian Good Roads Association. He urged uniformity of traffic laws in general and speed laws in particular.

Although reckless, inefficient or drunken driving was a factor in causing accidents, Mr. Baker said the vast majority of persons involved in accidents were honest, law-abiding citizens, driving competently and with reasonable caution. They were chargeable at worst with bad judgment rather than a fixed intent to jeopardize themselves.

Enforcement inflicted in a spirit of revenge defeated its own end and wronged the community. It should seek to correct and educate. Suspensions and revocations of licenses had a greater deterrent effect on erring drivers than almost any other punitive measure.

Convictions always should be followed by punishment but the penalties should be neither unusual nor unreasonable. Impartial, continuous and efficient enforcement would inevitably decrease the accident rate.

"Where the human element is involved there is no such thing as absolute control," said J. B. Bickell, Ontario registrar of motor vehicles. No amount of education or regulation would make every individual act according to a set pattern.

The Ontario minister of highways had power to suspend or revoke licenses on conviction for speeding or recklessness causing accident, racing, drunk driving and any criminal offence involving use of a motor car. This power has been exercised almost 30,000 times in eight years.

Co-operation of the Ontario health department is enlisted to prevent issuing of licenses to epileptics or mentally irresponsible persons, while a close check is kept on physically incapacitated applicants.

Operate Large Farm

Colonization Finance Corporation Control Large Holdings

Probably few people are aware that Winnipeg is the headquarters of the largest farm management and service company in the world, said Louis L. Lang of Galt, Ont., president of the Colonization Finance Corporation of Canada, Limited, who arrived to begin a western tour of inspection of farms supervised by farm managers of the corporation.

The Colonization Finance Corporation and the Canada Colonization Association, a subsidiary of the Canadian Pacific Railway under the same general management, are closely associated and have under supervision some 4,800 farms in the three prairie provinces totalling 1,370,000 acres.

"Our distribution of Thatcher, Renown and other rust resistant wheats during the last few years was one of the important services we rendered to our farmers and members," said Mr. Lang. "This year 95 per cent. of the company lands are sown to rust-resistant wheats, the yield averaging 25 bushels to the acre of No. 2 Northern. Ordinary wheats would undoubtedly have reduced the yield to 10 bushels."

Improving On Nature

High-Speed Machines Now Take Fuzz Off Peaches

Uncle Sam is putting up the money to take the "fur" off Georgia peaches.

High-speed de-fuzzing machines run with electricity furnished by a rural power co-operative financed with a loan from the Rural Electrification Administration are now in operation in Upson County.

The peaches are spun about the rollers while in contact with brushes with just the right pressure to take off the fuzz and make them more attractive and palatable to eat fresh, it is explained.

A cat, a rook and a young brown owl have become pals in Brighouse, England.

Increase In Meat Exports

Total Value To Canada Last Fiscal Year Was \$41,362,000

Canada's export trade in meats is one of the most active branches of the external commerce of the Dominion. In the last fiscal year there was a gain in value of over 14 per cent., and this followed a steady upward trend over six years in which its value has been multiplied fivefold. The greater part of these exports are shipped to the United Kingdom, and the increase in this branch of the trade last year was 15 per cent. At the same time meat exports to the United States likewise showed a considerable advance.

Four-fifths of the export value last year was in bacon and hams, which increased nearly 16 per cent. Increases in exports were reported last year in nearly all other kinds of meats as well.

Exports of meats from Canada in the last fiscal year, which ended with March, had a total value of \$41,362,000. In the previous fiscal year the value was \$36,114,000. In the fiscal year ended in March, 1933, the total value of these exports was only \$6,683,000. Of the total exports in the last fiscal year the United Kingdom took \$36,159,000.

Exports of meats to the United States were valued at \$3,271,000. Fresh pork is the item in which trade with the United States plays the largest role in meat exports. In the last fiscal year the total exports of fresh pork were \$2,290,000, of which \$2,077,000 was shipped to the United States and only \$151,000 to the United Kingdom.

New Type Of Mattress

Eighty-Five Per Cent. Air And Fifteen Per Cent. Rubber

A new and entirely different type of mattress was announced recently. This new mattress is formed of sponge rubber made of latex, the milk of the rubber tree, whipped to a foam and vulcanized in a single piece. It is made in bed sizes, is about five inches thick, and for additional springiness and ventilation is pierced by finger-sized holes in an all-over pattern. The sleep cushion is actually about 85 per cent. air and 15 per cent. pure rubber, so that it weighs only about half as much as the ordinary mattress.

This new type of material eliminates padding, springs, wires, tufts, or buttons, and has a perfectly smooth surface. A cloth cover fits smoothly over the cushion. Since the material used is much softer than the body, the mattress conforms perfectly to all sleeping positions, shaping itself to every contour. When compressed, its tiny air cells release their air and then fill again as the pressure is changed or lifted, so that the mattress virtually "breathes." Scientific American.

Makes Map Of Moon

Welsh Engineer Has Been Working For Four Years On Job

For four years H. Percy Wilkins, Welsh engineer, has been engaged on one of the world's biggest mapping jobs, and he is only half finished. For amusement Wilkins is working on a 25-foot map of the moon.

Among mountain peaks some of them which rise higher than Everest, astronomers have spotted dark patches which move along the moon's face.

"Personally, I think they are some form of fungus in the damp spots," says Wilkins. "There are things that lead me to believe there are traces of moisture and some slight atmosphere on the surface of the moon. Life, maybe, but human life, definitely not."

Canada's Leading Exports

Newsprint worth \$126½ million was Canada's greatest item of 1937 export, while wheat ranked second at \$124½ million. Third place was held by gold bullion at \$105¼ million, and fourth by nickel at \$59 million. Meat was the seventh most important item, with a total export value of over \$42 million. 2273

High Or Low Grade Honey

Greatest Care Should Be Taken In Extracting Honey

Honey, to the chemist, is essentially a highly concentrated sugar solution. To the consumer honey is a delicious food direct from nature. It contains, besides the highly nutritive sugars, many other elements essential to the human body.

Since most honey is marketed in the extracted form, unchanged in composition, it is of many different shades of colour and has a great variety of flavours. Honey also varies in moisture content depending, to a certain extent, on the weather conditions during the nectar gathering period. The length of time the honey is allowed to remain on the hive before extracting has also a bearing on the density, therefore, the supers should not be removed for extracting until the combs are at least three-quarters capped. During extracting, care should be taken to avoid the honey becoming spoiled in any way.

This may happen by the absorption of moisture from the air, so that the drier the honey house the better. Steam should not be allowed to escape into the air of the extracting room and the windows should be kept closed during damp or rainy weather. Even capped or comb honey stored in a damp place will absorb moisture from the air.

Honey should be heated only sufficiently to facilitate straining, if, indeed, heating is necessary. The volatile oils which are present in infinitely small quantities are driven off by heat. It is these oils which give honey its fine aroma and flavor, therefore, excessive heat should be avoided.

The texture of granulated honey depends largely on its treatment while in the liquid state. Granulation is retarded by heating and the quicker the granulation the more uniformly smooth the final product. Therefore, after extracting honey should be stored in a cool, dry place.

Cleanliness in handling honey cannot be emphasized too much. Honey rapidly deteriorates under careless handling, and while the grading regulations attempt to ensure the consumer that he is getting a quality product, only the carefulness of the producer can give him honey at its best. The delightful flavour and aroma of fresh honey should accompany it to the consumer's table. The apiarist who aims to do this will produce high grade honey, states Wm. A. Stephen, of the Bee Division, Dominion Department of Agriculture.

Knew Her Bible

A country school was visited by one of the Governors a man with a pompous air. He put some questions, and one of them was, "What is the Sixth Commandment?"

When no one answered he tried again.

"Come, what Commandment did Cain break when he killed Abel? Who can tell me?"

One scholar beckoned to the teacher and whispered something to her. The visitor demanded to know what the child had said, and the teacher quietly replied:

"The child simply said that there were no Commandments when Cain killed Abel."

Plans Are Made For More Extensive Use Of Rust Resistant Wheat In West

Prairie agriculturists are planning for the 1939 wheat crop even before completion of this year's harvest. The program aims at more extensive seeding of rust-resistant wheat, a determined anti-grasshopper campaign and widespread prairie farm rehabilitation administration activities.

One of the most important factors in ensuring a good crop next year lies in seeding rust-resistant wheat in areas susceptible to rust. Alberta was not affected materially by rust this year, but in Manitoba and more particularly Saskatchewan the damage was considerable, although accurate figures are not available.

Rust-resistant wheats, Thatcher, Apex and Renown, were used extensively in Saskatchewan this year for the first time, seeding some 2,000,000 acres of the estimated 13,900,000 acres in wheat. Production was estimated at 30,000,000 bushels.

Value of the new varieties is indicated in the Saskatchewan wheat pool estimate of average yields per acre in the province: Rust-resistant, 17.4 bushels; other bread wheats, 10.2 bushels; Durums, 12.3 bushels.

Total production of some 60,000,000 bushels of rust-resistant wheat in the prairie provinces ensures an adequate supply for seed next year for the first time. Authorities estimate 12,500,000 bushels will be required to seed the affected areas, 2,000,000 acres in Manitoba and 9,000,000 acres in Saskatchewan.

Provincial governments are formulating plans for distribution of seed and already the Canadian wheat board has authorized elevator companies to exchange rust-resistant varieties for non-resistant grain at wheat board prices. Last year Thatcher sold for seed at a premium, farmers generally paying \$1.50 a bushel.

Prof. Manley Champlin of University of Saskatchewan, who helped develop Apex wheat, says experts generally expect 1939 will be the first year the rust menace will not be felt to any great extent in western Canada. He said appearance of a rust form virile enough to affect resistant wheats is a remote possibility.

Unofficial estimates place grasshopper damage, largely in Saskatchewan at from 10,000,000 to 30,000,000 bushels this year.

Proposals for an international anti-grasshopper campaign are supported by Hon. J. G. Taggart, Saskatchewan minister of agriculture, and K. M. King, Dominion entomologist at Saskatoon.

The prairie farm rehabilitation administration program includes promotion of farming systems that will afford greater economic security, water development for fullest utilization of surface water and land utilization where areas of inferior soil are being removed from crop production and community pastures established.

Forty-seven district experimental sub-stations are demonstrating and

testing methods of utilizing moisture and controlling soil drift. There are 109 district associations with 14,000 members. Tree planting and re-grassing are in the program.

Water development includes engineering and financial assistance to individuals and communities. George Spence, P.F.R.A. director, estimates that by the end of 1938 more than 7,000 individual dugouts, stock watering and irrigation dams will be completed in the three prairie provinces.

Large projects completed or under construction will provide irrigation of some 125,000 acres in Alberta and Saskatchewan.

Mr. Spence said there were some 60,000,000 acres of land within the open plains area of the three prairie provinces, 25 per cent. of which was either marginal or non-arable. It was the intention under the P.F.R.A. plan to in time remove from cultivation a large portion of these marginal and non-arable lands and turn them back to grazing through the establishment of community pastures and reserve areas.

These pastures will be administered for the benefit of the remaining adjacent settlers, who, by reason of a combination of better lands and the use of these pastures and water development to enable them to grow winter feed, will be rehabilitated and permanently established.

Large Space For Recreation

The Queen Elizabeth Is Truly A "Keep Fit" Ship

From the point of view of the operating company and of those who will use the ship, the passenger accommodation is of first importance, and in this respect the Queen Elizabeth will far eclipse anything hitherto seen.

By cutting down the number of funnels a huge amount of space has been saved on the liner's 14 decks. Much of this space will be given over to games and recreation.

The Queen Elizabeth will be a "keep fit" ship on an unprecedented scale. Not only will there be a gymnasium, swimming pool, and baths of various kinds for cabin passengers, but there will also be a gymnasium and pool for tourist passengers, and a gymnasium for third-class travelers.

In addition, there will be the vast sports deck available to all classes, and the spacious "playing fields" laid out on the terraced decks at the after end of the vessel.

Another innovation is the introduction of a "restaurant deck," on which will be installed special restaurants for all classes of passengers.

There will be no fewer than 29 public rooms available for the ship's floating population, many of which will be equipped with the most up-to-date air conditioning plant.

Cocktail bars, little restaurants, and lounges of all kinds will be scattered throughout the ship. News of the World.

Not An Uncommon Sight

Observation Has Proved Ants Venerate And Bury Their Dead

A story in "Our Dumb Animals" says an ant funeral is not uncommon in many ant communities. That they venerate their dead and observe funeral rites has been proved by actual observation. They go about this business of burying their dead in an orderly fashion. They have been known to form processions and march by twos, a dead body being carried by two; at intervals the two laden ants stopping to be relieved of their burden by the two walking next in line. A procession of this kind is sometimes followed by an irregular body of ants. Upon reaching the spot selected as a burial ground, they immediately begin digging holes in the ground, into each of which an ant is laid. All graves are filled before the return home is made.

Radio is a new and noisy method of letting peddlers into your home.

Sound travels 11 times as fast in copper as in air.

The World of Wheat

By H. G. L. STRANGE
Director "Crop Testing Plan"

Sometime ago our Research De-
partment compiled and published a
chart showing 538 years of wheat
prices.

The chart revealed a number of
severe rises and falls in price through-
out the years. We found that these
fluctuations always coincided exactly
with great wars. We therefore set
about studying all the wars that had
occurred for the same period, i.e.,
the last 538 years; and we found
some amazing things.

The world during 538 years has
only been at complete peace for 51
years. France has been at war dur-
ing that period, 300 years; Russia
261 years; Austria 238 years; Great
Britain 232 years; Spain 213 years;
Turkey 192 years; Germany 187
years; Italy 117 years; Holland 106
years; Portugal 40 years; and the
United States 27 years the most
peaceful country having been China.

Most of the wars were fought, we
found, to obtain possession of lands
that produce wheat, foodstuffs and
other raw materials. Then, later,
other countries would arise and at-
tempt to take those lands for them-
selves from those who had previous-
ly conquered them; and so it seems
to have gone on and on throughout
the ages.

One invariable result of war has
ever been, first very high, and then
very low wheat prices.

Following factors have tended to
raise prices: Apparent European
political crisis -- Rain needed in
northern Argentina -- European
millers desire best spring wheat to
strengthen mixtures -- India reluc-
tant to sell wheat -- Poland distilling
rye -- Norway buys Canadian rye --
Belgium buys substantial quantities
of U.S.A. wheat -- France buys
North African Durums.

Following factors have tended to
lower price: Possibilities of peaceful
European settlement -- Liverpool
wheat stocks double a year ago --
Swedish wheat crop larger than 1937
-- Abundant supplies of bread grain
in Germany -- War risk insurance
on cargoes to Germany suspended.
All other rates at least doubled --
Ukraine and southern Russia receive
beneficial rains.

Prevent Fires

These simple suggestions, if
followed by everyone in the
family, will make your home
safe from fire.

Put lighted matches and smokes out
before you throw them away.
Keep matches where small child-
ren cannot reach them. Never
smoke in the garage, barn, attic,
nor in bed.

Remove rubbish, waste papers and
all unnecessary combustible ma-
terials. Provide metal ash and
safely covered brick or metal
trash cans. Burn rubbish only in
container. Watch the fire.

Examine all stoves, furnaces, and
smoke pipes to make sure they are

safe and well away from woodwork
or other burnable materials. Have
needed repairs made at once.

Value the advice of your fire chief,
who says that many fires are
caused by dirty or defective chim-
neys. Have the chimneys cleaned
regularly and have all defects re-
paired.

Escape the danger of flammable
liquid fires and explosions by
keeping no gasoline in the house.
Do dry cleaning with safe liquids
or send the work to the cleaner.
Never start fires with kerosene.

Notify the electric company of elec-
trical trouble and the gas company
of gas leaks. Replace "blown"
fuses with new ones—not pennies.
Avoid home-made wiring jobs.
Don't look for gas leaks with a
match.

Teach everyone in the family to be
careful of fire, to watch stoves,
fireplaces, electric irons and all
other possible fire causes, and
every day to remove old rags,
papers and other rubbish.

Fireproof your home as far as pos-
sible with fire safe roofing, fire-
stopping in hollow walls and parti-
tions to stop the spread of flame,
and a non combustible basement
ceiling.

Inquire of your fire chief, when
buying a fire extinguisher, to be
sure of getting the right kind.
Don't hesitate to ask your firemen
whenever you have questions on
fire prevention.

Remember always where the fire bell
or other alarm is situated. If
telephoning be sure the address is
clearly understood. Use a neigh-
bor's phone rather than the one in
the burning building.

Explain to everyone in the house
what to do in case of fire, how to
put out fire in clothing by wrap-
ping the person in rug or blanket,
what to do when grease catches
fire in the kitchen.

Save life and property from needless
destruction by fire by keeping the
principles of fire prevention al-
ways in mind and never taking a
chance with fire.

Items of Interest

Bank clearings at Calgary for the
month totaled \$32,174,821, as
against \$26,294,185 for the same
period in 1937.

Officials of the clearing house are
of the opinion that the majority of
the farmers are marketing their
wheat early.

This week Mr. Joe Buccini of
Calgary picked from a tree in his
back yard an apple weighting exactly
11 ounces, a weight that would be
considered highly respectable by
by growers in the Okanagan Valley
in B.C. The variety is said to be
McIntosh.

YOUR COUNTRY NEEDS YOU

Perhaps you shrink from these words; and who can
blame you? They recall all too vividly the patriotic fervor
of a nation in arms and the epilogue of horror and heart-
break. But, although the call is more urgent for your help
in a crisis, your country needs you just as surely in the cause
of peace and progress. If you and your neighbors are
prosperous, your country prospers. If you and your neigh-
bors are well informed and progressive, the whole country
reaps the benefit.

Greater progress, higher standards of living, better ways
of life, are possible to an informed people. It is your privi-
lege to be informed fully on all matters of importance
through a free press. Make full use of this freedom, denied
in so many other countries. Be informed. Keep a voice in
your own government.

Burnside Notes

Mrs. Ted Bolton and two children, of Westerdale, is visiting her parents, Mr. and Mrs. Bert Pross. Mr. Bolton also spent the week end at the Pross home.

Mr. Maurice Charlton, of Acme, spent Sunday with Robt. Eckel.

Mr. James McCulloch is in the Didsbury Hospital taking treatment for the knee injury which he suffered some time ago.

Mr. and Mrs. Fritz Wagner and daughters Rita, Mary and Doris, of Wimborne, spent Sunday with Mrs. N. Eckel.

Mr. Owen Milne left on Saturday for Vancouver.

Miss Marion Taineh and Mr. Fred Metz spent Sunday with the former's parents, Mr. and Mrs. Peter Taineh of Sunnyslope.

Mrs. William McCulloch spent a few days last week in Didsbury with Mrs. Wall.

Carstairs E. Community

Denver King is driving a new V8 2-ton truck.

Tony VanMeal has rented the Jno Goertz farm. Mr. Goertz, who has operated the farm during the past season will return home to his family at Vancouver, B.C.

Jim McCulloch had a slight cut in his foot with an axe, which was not considered serious, but blood poison set in and he had to be taken to the Didsbury Hospital. We are glad to be able to report that he is improving.

Don't forget the postponed Amateur Con test and Dance at the Hall will be held Friday, Oct. 14th at 8:30 p.m.

Miss Phyllis Charlton got her hand into the power washer. She is nursing a bruised hand, but fortunately no bones were broken.

Mare Goes To Vancouver.

W. J. Fulkerth has just sold that lovely mare Tishie Ann (Imp.) to Dr. F. R. Whaley, M.D.C.M., of Vancouver.

Tishie Ann is a very rich chestnut with silver mane and tail. She stands 15.3 hands high and weighs 1,165 pounds. She was sired by that great show and breeding stallion, Stonewall King, several times champion at the Missouri state fair, and a sire of champions. Her dam's sire was Astral King, also a state fair winner.

We have not learned the price of this mare, but understand that it was well up into four figures. Mr. Fulkerth has a yearling stallion from Tishie that is a real topper.

These Kentucky saddle horses are gradually spreading all over the world and are greatly admired wherever shown.

NOTICE

To Relatives of Persons on the Assessment Roll and to Tenants.

Notice is hereby given that during the months of September and October, applications may be made under the provisions of Section 188 of the Town and Village Act for inclusion in the voters' list of the Town of Didsbury by the following persons, namely:

The wife, husband, father and mother and every son and daughter of any person whose name appears upon the assessment roll who are entitled to be placed upon the said list:

(a) if he or she is resident within the town or assists him in a business in respect of which he is taxable; and

(b) if he or she is of the full age of twenty-one years; and

(c) if his or her name does not already appear on the roll; and tenants who have rented an assessed parcel for a period of twelve months immediately preceding the last day of August of this year; and the wife, husband, father and mother and every son and daughter of tenants who have made application as aforesaid.

W. A. Austin,
Secretary-Treasurer.

Burns Fatal to Farmer's Wife.

Injured when a can of fuel oil exploded, Mrs. Fred Yoos, 27, wife of an Olds district farmer, died at the Olds Hospital on Sunday.

Mrs. Yoos was enveloped in flames when the oil exploded as she attempted to hurry the kitchen fire.

A boy helper on the farm, Buddy Guitard, sitting besides the stove, was sprayed with burning oil but was not seriously injured.

Mr. Yoos and two children, Joseph, seven, and Elaine, three, survive. The family came recently to Olds from Saskatchewan.

Winter Programs Start On Radio

This week sees the commencement of the fall and winter programs on the air.

The following outstanding programs, most of which have been off the air during the summer, will be given over the C.B.C.—

Silver Theatre: Sundays 4 p.m.

Jell-o Program with Jack Benny: Sundays 5 p.m.

Chase & Sanborn Hour: Sundays 6 p.m.

Lux Radio Theatre: Mondays 7 p.m.

Big Town: Tuesdays 9:30 p.m.

Al Jolson Show: Tuesdays 10 p.m.

One Man's Family: Wednesdays 6 p.m.

Good News of 1939: Thursdays 7 p.m.

Kraft Music Hall: Thursdays 8 p.m.

Hollywood Hotel: Fridays 7 p.m.

Memorial Window For Banff Church

Inspired by the beauty of the Canadian Rockies, and the sweet tones of the bells of St. George Church, Banff, Alberta, Miss Jessie Van Brunt of Brooklyn, New York, has presented the church with a memorial window which she designed and made herself. The window embodies the idea of the Church bells as angels or God's messengers sending inspiring invitations to worship. It was placed above the main entrance and is in memory of the late Canon Henry Montgomery, M.A., rector of this church from 1921-24, previously rector of St. Peter's Church, Kingsclear, N.B., and Canon of Christ Church Cathedral in the diocese of Fredericton, N.B., also rector of St. Barnabas Church, Calgary. He served in the C.E.F. from 1916-18, being chaplain of No. 14 Canadian Hospital at Eastbourne, England. He died at 75 on July 9, 1929.

Rev. L. Ralph Sherman, M.A.B. Litt., D.D., Bishop of Calgary, recently dedicated the window.

The bells which inspired Miss Van Brunt were donated by Hon. Robert Brett, Lieutenant-Governor of Alberta in 1925, later being dedicated by Rt. Rev. Cyprian Paskham, D.D., D.C.L., late Bishop of Calgary, in 1927. Rev. Canon Fully Montgomery is the present rector.

WORLD HAPPENINGS BRIEFLY TOLD

The will of Daniel G. Dodge, filed at Pontiac, Mich., for probate, left \$250,000 to his widow, the former Laurine McDonald.

Officials of the Montreal Chinese Patriotic Society announced \$5,000 had been raised for relief of Chinese war refugees in a charitable campaign.

General Malin Craig, United States army chief of staff, said the army has developed new anti-tank guns, which would wipe out an enemy tank offensive.

Canada is one of the three leading flour-exporting countries of the world. It ranks second to Australia, while the United States is in fourth place.

The estate of Robert P. Scripps, publisher, who died last winter, was valued at \$3,033,567 in an appraisal on file.

Sir Henry Page Croft, Conservative member of parliament, returned to London from a survey of immigration prospects in Canada, hopeful of the possibility of settlement of Britons in British Columbia.

Dominion government employees in Ottawa number 12,845 and their annual salaries amount to \$20,600,000, according to a survey recently completed by the finance department.

A decree signed by King Vittorio Emanuele and Premier Benito Mussolini placed in effect the cabinet decision of Sept. 1 to expel foreign Jews who have settled in Italy since Jan. 1, 1919.

Wheat fed, or to be fed, to livestock and poultry in Canada during the 1937-38 crop season has been estimated preliminarily as 18,938,000 bushels, as compared with 15,794,000 bushels in the 1936-37 season.

Judge Came To Rescue

Settled Case Between Debtor And Creditor In Satisfactory Way

Judge T. M. Costello conducted so successfully a piece of arbitration between a debtor and creditor in division court at Goderich, Ont., that now he owns two cords of wood for which he paid \$6.85—the amount involved in the debt argument.

"I can pay it in wood but I have no cash," the unnamed debtor told the proprietor of a baking establishment seeking payment of the debt.

"I can't pay my own accounts with wood," the baker replied. "I want cash."

Then the judge interposed: "Very well. Deliver to me the two cords of wood and I'll pay the money to the bakery."

The baker beamed thanks, the debtor grinned his pleasure.

Speaks From Experience

Trained Newspaper Man Says Germany Plans Constantly For War

Germany's every move, political, social and industrial, is toward preparation for the day when a national emergency may arise, G.S. Williams, motoring editor of the Daily Telegraph, Sydney, New South Wales, Australia, said when interviewed.

Sudeten Germans in Czechoslovakia are looked upon by most Germans as blood brothers ready for assimilation by Germany at the first opportunity. There is no question in the minds of Germans today, Mr. Williams states, but that Hitler plans to annex Sudeten territory whenever he feels the time is propitious.

Only recently out of Germany, where he represented the Royal Automobile Club of Australia at the International Automobile Conference in Berlin, Mr. Williams speaks from long experience as a trained newspaperman and observer. He was taken throughout the length and breadth of Germany and many of their transportation improvements, including the thousands of miles of what he describes as the most advanced public highways in existence today.

The people of Germany appear well fed, the Australian visitor explained. This, he said, was a surprise, as he had heard before his arrival in Germany that there was a shortage of food.

It is true, he explained, that they have their meatless, eggless and butterless days. On such days they are satisfied to use substitutes for these foods—substitutes that their bodies are being trained to assimilate as food for the day when it may be necessary to survive on them.

Abolition Of Honking

Disappearance Of Horns From Motor Cars Is Foreseen

The eventual disappearance of horns and horn-buttons from motor cars is foreseen by Public Safety, the magazine of the U.S. National Safety Council, which advocates abolition of honking, not only to increase the public comfort but the public safety as well. Virtually every place where horn-blowing has been abolished has seen a drop in accidents.

Italy has had anti-horn regulations for the longest time and is completely satisfied with them. It is believed the privilege of honking will never be restored there. Anybody who uses his horn in traffic thereby brands himself (or herself) as a second-class (or worse) driver, says Miller McClintock, traffic expert, quoted by the magazine. A good driver in McClintock's opinion, analyzes the traffic ahead of him so no occasion will arise which will require his use of the horn.

SELECTED RECIPES

TART CRANBERRY SALAD

1 package Lemon Jell-O
1/2 cup sugar
1 pint hot water
2 cups raw cranberries
1 cup diced red apples

Dissolve Jell-O and sugar in hot water. Chill. Put cranberries through food chopper. When Jell-O is slightly thickened, fold in cranberries and apples. Turn into molds. Chill until firm. Unmold on crisp lettuce or romaine and serve with tart mayonnaise. Serves eight.

SHORTBREAD COOKIES

2 cups flour
1/2 cup St. Lawrence or Durham Corn Starch
1/2 cup icing sugar
1/4 teaspoon salt
1 cup soft butter
2 tablespoons cream
1/4 teaspoon vanilla

Cream butter, add sugar, add cream and vanilla, then dry ingredients well sifted together. Drop by teaspoons on greased cookie tins. Press down with tines of fork. Bake in a moderate oven 325 to 350 degrees F. until very light brown.

Economical Cattle

Midget Cows Eat Less But Produce More Milk

Otto Gray of Stillwater, Okla., who started experimenting with an undersized breed two years ago, reported his pint-sized animals have surpassed other members of his herd in milk production although they consume only half as much feed.

The midgets were developed from an undersized Angus cow and a normal Hereford bull, stand from 30 to 37 inches high and weigh from 450 to 500 pounds.

The Bank Of Canada

Is Under Full Ownership And Control Of Government

The Bank of Canada, which was nationalized by the Dominion Parliament during its last session, is the central bank of the Dominion. It was established by an act of Parliament in 1934 and began operations in March, 1935. At the outset it was privately owned, though the government controlled the appointment of the Governor. Two years ago the stock of the bank was increased and the government purchased a controlling share. Retiring the privately owned stock gives the government full ownership and control.

The Bank of Canada is the bankers' bank and the fiscal agent of the government. The commercial banking of the country is carried on by chartered banks, which operate under parliamentary charters and are supervised by a government-appointed Inspector-General of Banks.

The chartered banks are ten in number and have nearly 3,400 branches and sub-agencies, distributed throughout the provinces and territories of Canada. In addition, they operate 145 branches in some dozen other countries. The chartered banks have an enviable record for safety, no failure having taken place in the last 15 years.

A FROCK MATRONS WILL ADORE

By Anne Adams

What a flattering picture your full-length mirror will reveal when you wear this new afternoon slimmer by Anne Adams! For Pattern 4686 is definitely charming as well as slimming—the sort of frock that women feel like copying the minute they see it! Just select one of the lovely firm Fall Synthetics—or perhaps a silk with a raised self-design—and follow the helpful advice of the Sewing Instructor. You'll find that every seam is quickly and easily completed! Note particularly the button-trimmed, full-length panel with its centre pleat for walking ease. Then gaze carefully at the collar-finished neck; the becoming gathers springing from the pointed yokes!

Pattern 4686 is available in women's sizes 34, 36, 38, 40, 42, 44, 46 and 48. Size 36 takes 4 1/2 yards 39 inch fabric.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number and send order to the Anne Adams Patterns Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

France Will Use Buses

If It Is Necessary To Rush Troops From Paris

The "taxi of the Marne" which helped turn the tide of German invasion 24 years ago, will be replaced with buses if the necessity of rushing troops from Paris ever arises again. The war ministry ordered the Paris Transport Company, owner of the capital's buses, to turn over a number of their regular city buses for use in army manoeuvres.

WHAT! ALL THESE EXTRA FEATURES COST NO MORE?

Jamaica's Hurricane Season

When Signal Shown Every Precaution Taken Against Storm

Almost any time in late August or early September you'll find West Indians scanning every cloud with a faint shadow of uneasiness. A cloudy sky at any time means something in this sunny Caribbean district, but in the fall it may presage storms that sweep the islands bare of all but the strongest buildings and vegetation. It's hurricane season down there.

When the two red flags with blue checkers in the centre fly from signal stations, the somnolent populations spring into frenzied activity. What crops will stand it are hurriedly crowded into cellars. Livestock is crammed into the strongest outbuildings, storekeepers board their windows. Small boats are hauled up far out of reach of possible tidal waves. Larger ones are hurried into landlocked coves, moored with double lines with plenty of slack, and everything is cleaned off their decks.

But all too often the preparations are interrupted. First the birds stop singing, and all the tiny insect life hushes as a strange stillness pervades the atmosphere. The sun takes on a coppery look. Suddenly the skies darken, then rain starts falling, gently at first, but increasing to incredible volume.

The wind strikes with the impact of a thunderclap. In an instant the air is filthy with flying dust and debris. Then it really starts to blow.

The hurricane differs from the tornado known in the southern United States in that it is an immense, revolving current of air which may cover an area of a thousand square miles. The tornado, which rarely is more than ten miles from edge to edge, sometimes moves with a greater velocity than the hurricane, but in scope and destructive ability it runs a poor second.

Boast Out-Of-Date

It used to be—it still is with a few—the practice to boast about how fast the "boat" or "old bus" could travel. That was foolish; the sensible idea is to drive always so that the car is under control and let the surplus speed lie in reserve until emergency demands it.

New Post Offices

Two new post offices were established in Saskatchewan recently. One is named Lone Spruce and is situated in the Prince Albert electoral district, and the other is known as Trojan in the Rosthern district.

Canadian Films

London Imperial Institute Wants More For Its Library

Sir Harry Lindsay, director of the Imperial Institute at London, England, appealed in an interview for more Canadian films for the institute's film library which illustrates industries, scenery and other aspects of British Empire countries.

Although Canadian films occupy the largest single section of the catalogue, Sir Harry hopes to obtain more films during his present visit to the Dominion.

Because demands of schools and societies for loan of films far exceed the supply, the institute has not dared to advertise the library's existence as the management knew wider publicity would merely swell the number of disappointed applicants, he said.

Afraid Even Of Flowers

Nazis Are Forbidden To Throw Bouquets At Hitler's Car

Germans were not permitted to throw flowers at the motor cars of Adolf Hitler or members of his entourage during the Nazi party rally at Nuremberg.

The organizing committee for the gathering decreed:

"Throwing of flowers at the Fuehrer's car or cars in his entourage is strictly forbidden, because of the danger arising therefrom for the cars' occupants. Storm Troop cordons must be fully respected. Advancing toward the Fuehrer's car is not permitted in any circumstances, as thereby serious accidents may be caused."

POOR MAN'S GOLD

COURTNEY RYLEY COOPER

COPYRIGHT-COURTNEY RYLEY COOPER • • • W.N.U. SERVICE

CHAPTER IV.—Continued

Kay Joyce, trim in polo shirt, fawn-colored breeches, riding boots and red nails of an equal lustre, leaned out.

"Jack!" she called. "Don't splash around like that. How in the world will you ever carry mother and me ashore? We'll be simply dripping, you old silly!"

It was Bruce Kenning, however, who finally carried Kay and her mother ashore. Hammond, all of a sudden, had realized that he was a sodden mess. Then, with the landing of the party, everything became confused; gold seekers crowded about, placer miners waded out to catch the rope which Timmy Moon had tossed to them, that they might knot it to a pontoon and anchor the ship. Now Hammond was back in his own cabin, talking excitedly as he changed his clothes.

"Kay's crazy about the cottage," he volunteered.

McKenzie Joe, squatted on the doorstep, turned his beaverlike head. "I figured she would be, for awhile."

"What do you mean awhile?"

"They're city people," said McKenzie Joe quietly.

Hammond laughed, tightened his belt, stood immobile a moment, then clawed about him in the half-dark room for a necktie.

"Don't you worry about that. Kay can take it. So can her mother. They like the outdoors."

McKenzie made no direct reply. He only eyed his partner.

"Kind of dressing up, aren't you?"

"Well," said Jack with a grin. "You know—their first night here. We're all going to the Slumgullion to eat. Come along?"

"Nope," Joe said it half brusquely. "Little abrupt, aren't you, Joe?" he said at last.

"Not particularly."

A queer feeling of resentment shot through Hammond.

"Joe," he said finally, "what's been eating on you?"

"Nothin' but mosquitoes, I reckon."

"Let's not joke," the younger man said suddenly. "You've been different ever since we came back here."

"Me different? I ain't noticed it, Jack."

"You haven't seemed yourself. Moody—thinking about something

all the time. Grouchy, like you had a chip on your shoulder."

"When?" asked Joe.

"The other day, for instance, when Bruce Kenning dropped by our test pit."

"He was asking a lot of questions, wasn't he?"

Hammond spread his hands.

"Oh, Joe—suppose he was? Can't a man be interested in what a friend's doing? You'd think he was going to jump our claims, the way you act."

"That wouldn't do him much good," the old prospector said, with a masked smile. "Not the way they're turning out."

"Then why be so cagey? We haven't got anything to hide."

"The Idea's Worth Keeping to Ourselves."

"We're got our theory, ain't we, that the big discovery's yet to be found? This stuff that's been turned up ain't nothin' but chicken feed. We've got the richest placer claims along the new bed of Loon creek and we'll be lucky if they bring us fifty thousand dollars." McKenzie Joe's keen eyes swept the valley. "There's a bonanza around here somewhere, if we ever find that old river bed. The idea's worth keeping to ourselves."

"I suppose so. On the other hand, Kenning's a geologist. It might pay us to give him a little information—even cut him in."

McKenzie Joe rose and tossed the stick away.

"Not while I'm a partner in this shebang," he said. Then, hesitantly, "I guess I'll go eat."

"You won't change your mind, and come with us?"

"Oh, not tonight. You've all got things to talk about."

Hammond watched him stalk away; it was not his imagination, he told himself, which made him feel that Joe was different. Silent, almost morose at times; working quietly and without response while Hammond planned enthusiastically for the future, when Kay would be there and Sapphire Lake a city.

"Joe must be getting old," he said at last, and dropping down the step, hurried through the criss-cross of cabins and tents toward the trail which led to the cottage.

Kay turned from a window and strode toward him with a swinging step which matched her outdoor clothing.

"You old dear!" she exclaimed.

"I thought I'd better hurry back," Hammond explained buoyantly. "Just to be sure you were really here."

"If your ears rang like mine, you'd know we were here," broke in Mrs. Joyce. "Sitting cooped up in that airplane for I don't know how many hours!" She sat cross-legged on one of the two bunk-like beds, poking a cigarette into a long, green holder. Kay cut in.

"Can you imagine," she asked, as she came close to Jack, and with a maternal manner, straightened his tie. Only her close-fitting jersey imprisoned her full breasts; they touched Hammond's arm, yielding softly to pressure. "We hardly paused all the way here from Vancouver."

Hammond barely heard her; his blood was stinging in his veins.

"Good thing we didn't have to turn back when we got here," growled Timmy, from his sprawled position on a rough chair. "We'd have been in a hell of a fix if this lake had been frozen over."

"But it wasn't frozen, Thickwit," Kay jibed. She turned from Hammond and leaned over the back of Timmy's chair. She tweaked the pilot's nose. "Always the cheerful little earful! He's had us smashed up a dozen times since we started."

"Well, who wouldn't be careful? Finding a place that hardly exists in a crate like that old boat of mine. A fellow's got to think of his responsibilities."

"How many stops did you make getting here?" Jack asked.

"Only a couple," Kay volunteered. "Once at Stewart lake for gas and for Timmy to study his maps. Then again at Fourcross."

Jack whistled.

"You moved right along."

Mrs. Joyce regarded her cigarette holder.

"That's what happens when a girl really wants to see a man," she observed calmly. Hammond laughed and could think of nothing to say.

Kay crossed the room and dropped into a chair.

"Now that it's over, I'm tired."

Then she added, "Couldn't we have dinner served up here?"

Hammond shook his head.

"Nothing like that. It's a matter of getting it when the cook's willing. I'll have things organized for you in a day or two—I've got a line on a woman who can come here and do the work for you."

"Wonderful," said Mrs. Joyce, with her usual lack of expression.

"And in the meanwhile," announced Timmy, "we'll eat at the Quick and Dirty and like it."

"When?" asked Mrs. Joyce.

"We're waiting for Bruce Kenning, Mother."

"As usual, we've waited for him for ten years."

"Yes—father always said he was the latest thing in mining men."

Hammond laughed louder than anyone at that. Jokes had been few for him in these long weeks of waiting.

Bruce Kenning was coming in the door. After that, the conversation became jumbled; so much to be gone over again, calls for food from Timmy Moon, monosyllabic cut-ins by Mrs. Joyce, questions to be re-answered about the trip. But at last they were down the hill and at the cruddy doorway of the Slumgullion. For a moment a queer feeling of trepidation shot through Jack Hammond. For the first time, he wondered what Kay would think of these crude surroundings which she would find on every side, the lack of comforts of civilization. But the answer came almost as soon as his mental question. Kay had tipped her blonde head and glanced about her at the sloping log building, with its glassless windows of mosquito netting, its faint illumination of two ancient oil lamps, its vague forms, seated at rough tables, dimly discernible through the netted door.

"Isn't it cute?" she exclaimed. "Just like a movie set. Look, Mother, it's simply gorgeous!"

"Gorgeous is hardly the word," came the acidulous rejoinder from the angular Mrs. Joyce.

"Well," Hammond laughed with relief, "at least it's unique. Set this down in the main street of an American city and you'd have a crowd around it in five minutes." Suddenly he drew back. "Oh, Kay!"

"Yes," she turned from the door. "Here's someone I'd like you to meet."

Jeanne Towers was approaching, also headed for the restaurant. She hesitated as she noticed the little throng in front of the doorway, but Hammond called her forward.

"Jeanne," he said, "here are my friends from Seattle. Kay, this is Jeanne Towers. Remember I wrote you about her?"

(To Be Continued)

Life On The Farm

Farmers Have Lower Death Rate Than Business Or Professional Men

If you would live to a ripe old age, go to or remain on the farm.

This is one of the interesting findings made by the public health service in a study covering ten of the American States. Agricultural workers in the states studied were shown to have a much lower death rate than successful business and professional men.

The mortality rate of agricultural workers per 1,000 population, between the ages of 15 and 64, was 6.2 per cent. That of professional men was seven per cent. The highest rate, 13.1 per cent., was for unskilled workers, while the rate for all classes was 8.7 per cent. Contributing factors to the high death rate in the unskilled class include diet, housing, amount of medical care, contact with infected persons and low income. Tuberculosis and pneumonia were the two most outstanding causes, with accidents ranking third.

Annoying For Others

Psycho-Analyst Adopts Queer Way To Cure Patients

Young men entered one of London's most exclusive restaurants, sat at tables with "reserved" signs, and fiercely refused the headwaiter's request to move to another table.

They read the menu out loud, shouted that they could not see anything worth eating, then walked out.

"A psycho-analyst made us do it," they told the restaurant owner.

"He sends all his patients to fashionable restaurants and tells them to make a scene—to build up self-confidence."

Might Be A Bargain

The Italian newspaper *Messaggero* reported that the golden crown of Haile Selassie, once Emperor of Ethiopia, has been placed on sale by a London jeweler for a price of £500. The crown, studded with 718 diamonds, is a "great bargain at such a small price," the newspaper's London correspondent reported, "provided that the diamonds are not made of glass."

Thomas Jefferson wrote his own epitaph.

MEN LOVE GIRLS WITH PEP

If you are peppy and full of fun, men will invite you to dances and parties.

BUT, if you are cross, lifeless and tired, men won't be interested. Men don't like "quiet" girls. When they go to parties they want girls along who are full of pep.

For three generations one woman has told another how to go "smiling through" with Lydia E. Pinkham's Vegetable Compound. It helps Nature tone up the system, thus lessening the discomforts from the functional disorders which women must endure.

Why not try LYDIA E. PINKHAM'S VEGETABLE COMPOUND?

Will Your Lantern Stand This Test?

A hurricane, as officially defined by the United States Weather Bureau, is a wind "exceeding 75 miles an hour."

Tests just completed by Aircraft engineers on a Coleman Gasoline Lantern placed in a wind tunnel and subjected to a gale of 105 miles an hour couldn't blow out the light.

The secret of the Coleman Lantern's ability to withstand these high winds is due to the design of the heat resisting glass globe which deflects moving air away from the lighted mantles, it being impossible for direct blasts of air to strike the point of illumination.

and Irwin Klein on Sunday.

Members of the Junior Board of
Trade are reminded of the monthly
meeting on Thursday evening in the
Public School basement at 8:30.
Plans will be launched for a full
season's activity. Let's go fellows.

A. G. Studer is particularly proud
of his potato crop this year. We
saw vines in his patch that measur-
ed over 7 foot in height with a good
crop of clean potatoes some meas-
uring 8 inches in length.

Miss Nelda Huget who is visiting
her home here will leave Friday for
Kelowna, B.C., where she has ob-
tained a position at the Kelowna
General Hospital. Miss Huget com-
menced her training at this hospital
and later graduated at Vancouver
General Hospital.

A number of lady friends gathered
Friday evening, September 30th, for
a farewell party to Mrs. Hughes of
the Peterson Block, who is leaving
today to reside in Omaha, Neb.
The evening's program took the
form of an impromptu concert. The
guest-table for twelve was prettily
decorated with two tall vases of
baby orchids and a centre vase of
sweetpeas. A lady's travelling case
was presented to Mrs. Hughes, in
return for which she made a gracious
response. After luncheon the guests
rose, joined hands and sang "Auld
Lang Syne."

Bring your big Spuds to Berscht
& Sons. To the person bringing
in the largest, heaviest and most
perfect potato, will be given one
pair of Berscht's \$5.00 shoes, lady's
or gent's.

Meet After 48 Years.

Mr. and Mrs. John Duncan of
Chicago, Ill., are visiting the form-
er's brother, Mr. Tom Duncan and
family.

It is 48 years since the Duncan
brothers met, the last time they saw
each other being in Scotland at the
time Tom left for this continent.
Mr. John Duncan is employed with
the Borden Milk Co. in Chicago.

Allow Ten Days To Notify Board

Farmers desirous of having wheat
handled by the Canadian Wheat
Board this season have ten days
from the date of delivery in which
to notify the board, according to a
circular issued recently.

Text of Bulletin 41—regarding
notice of delivery to the board—
states:

"From this date, unless further
instructed to the contrary, producers
must first declare their intention of
delivering Class 'A' and Class 'B'
wheat in store to the board as soon
as possible, but not more than ten
days from the date below. (Septem-
ber 30).

"Similarly, on new deliveries, the
producer must declare his intention
of delivering to the board as soon as
possible, but not more than ten days
after the date of delivery."

M.B.C. Church Notes.

On Sunday, October 9th, Rev.
A. A. Lytle, secretary of the British
and Foreign Bible Society, will speak
at the Davenport School at 11:45
a.m. He will also speak at the
M.B.C. Church, Didsbury, in the
afternoon at 2:45. You are cordially
invited to attend.

Who Was Jezebel?

The management of the Opera
House is offering \$5.00 for the best
50 word description of "Jezebel" in
connection with the showing of the
picture by that title at the Opera
House on Friday-Saturday, October
14-15. So pick up your pencils,
folks, and do some research, find
out who Jezebel was and hand in
your entries at the box office on
either of the above dates at the
showing of "Jezebel."

A further prize of \$5.00 is offered
to the person who can describe in
writing the best comparison between
the character shown in the picture
"Jezebel" and those depicted in the
novel "Gone With the Wind." We
think we can see a comparison in
the characters, can you? If so,
write down your views and hand
them in at the box office on the
nights of October 21-22—and you
may win \$5.00.
